

OUTPUT

This is the first page of my quiz game which welcomes to the user .

This is the second page which tells the user about the instructions about the quiz game.

User has to enter his/her name . And click on submit button.

This is the first question of the quiz game . The user marks the option and then after clicking on submit button the game gives the feedback wheather the answer is correct or no. And after that it displays next button to goto to next question.

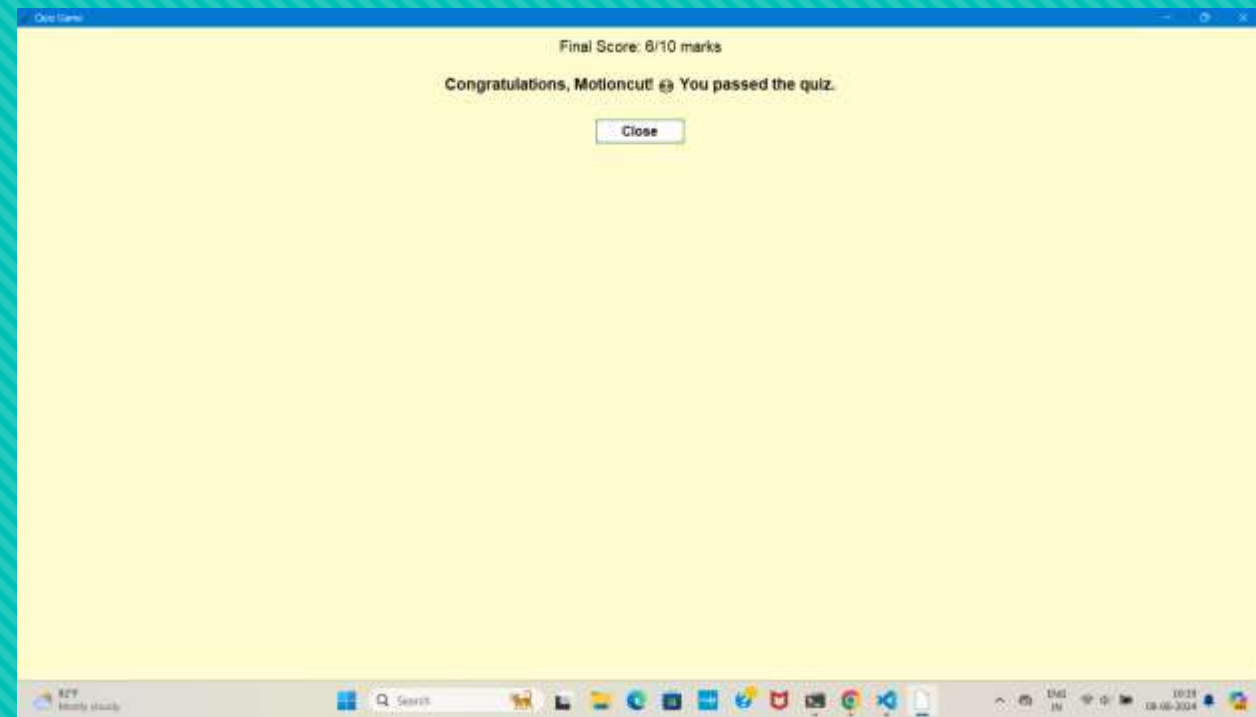

This is the second question of the quiz game if the user marks wrong answer it displays in red colour that your answer is wrong.

This is the third question there is a timer of 1 minute for each question if the user exceeds beyond 1 minute then automatically next question is displayed to the user.

Last page of the game tells the user wheather the user has passed the game or not.and additionally there is a close button to close the game.
